CERTIFICATE OF APPROVAL
No CF 5352

This is to certify that, in accordance with
TS00 General Requirements for Certification of Fire Protection Products
The undermentioned products of

AUDAX-KECK GMBH

Weiherstraße 10
75365 Calw, Germany
Tel: 0049 7051 1625-0 Fax: 0049 7051 1625-50

Have been assessed against the requirements of the Technical Schedule(s) denoted below and are approved for use subject to the conditions appended hereto:

CERTIFIED PRODUCT	TECHNICAL SCHEDULE
RENITHERM® PMA 1200 HD	**TS15 Intumescent Coatings for Steelwork**

Signed and sealed for and on behalf of Warringtonfire Testing and Certification Limited

Paul Duggan
Certification Manager

Issued:	14th July 2015
Revised:	25th June 2020
Valid to:	1st December 2024

RENITHERM® PMA 1200 HD

1. This approval relates to the use of RENITHERM® PMA 1200 HD for the fire protection of I-shaped beam and column sections and hollow columns. The precise scope is given in Tables 1 to 30 which show the total dry film thickness of RENITHERM® PMA 1200 HD (excluding primer and top sealer) required to provide fire resistance periods in accordance with BS476: Part 21: 1987 of up to 180 minutes for differing sections and section factors.

2. This certification is provided to the client for their own purposes and we cannot opine on whether it will be accepted by Building Control authorities or any other third parties for any purpose.

3. The products are approved on the basis of:

   i) Initial type testing.
   ii) A design appraisal against TS15.
   iii) Production surveillance under ISO 9001: 2000.
   iv) Inspection and surveillance of factory production control.
   iv) Audit testing

4. The data referring to three-sided fire exposure of beams relate to beams supporting concrete floor slabs. Separate consideration is required where this is not the case.

5. The data shown is applicable to steel sections blast cleaned to ISO 8501-1 Sa $2^1/_2$ or equivalent and primed with a suitable and compatible primer. Specifications of surface preparations, primers and top sealers are available from the manufacturer whose responsibility is to ensure RENITHERM® PMA 1200 HD is compatible for use in respect of both ambient and fire conditions. The total dry film thickness of primer and top sealer together should not exceed that tested.

6. The data shown is applicable to RENITHERM® PMA 1200 HD applied by spray to horizontal, vertical, flexural and compression members supporting loads up to the maximum design loads specified in BS449: Part 2.

7. The approval relates to on-going production. Product and/or its immediate packaging is identified with the manufacturers' name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.

8. The data shown in the tables is based on an assessment which complies with the criteria for acceptability now incorporated within the Certifire scheme.

RENITHERM® PMA 1200 HD
